ZERO RETRIES

JOURNAL OF THE

Northwest Amateur Packet Radio Association

Vol. 3 No. 1 January, 1987

MEETINGS The following meetings are scheduled.

Business Meeting	January 10, 1987 1:00 PM at the Radio Club of Tacoma Clubhouse
Technical Committee Meeting	January 10, 1987 Following Business Meeting at Radio Club of Tacoma
Board of Directors/Officers	January 15, 1987 7 PM at the Omni Restaurant, on S. 188th, in Kent. (Eat earlier if you wish.)

REMINDER Check the upper right corner of your mailing label for a number. This is the year through which your dues are paid.

A NEW PATH MAP Marc Herold, KN7MVO, and Bruce Gordon, AL7AQ, have produced a path map which is attached. This map lists most of the main digipeaters on 145.01 MHz in the Northwest. The map also lists some of the mailboxes and some of the mailbox forwarding links to other frequencies. Since the packet radio network is changing so rapidly, this information may not be up to date or complete. Marc and Bruce request that you inform them of any corrections or additions. Also they will be working on a similar map for 145.03 MHz. Other frequencies or types of maps may be added later.

5.03 HAPPENINGS Digipeaters on 145.03 MHz are WA7NTF-1 and WOLVJ-1 in Spanaway (S. Tacoma), W7JHS-1 in Prosser, and WB7CNJ-2 and WB7TLK-2 in the Tri-Cities. A temporary path north exists through N7HKH in Redmond. The mailboxes on 5.03 are KA7VKB in Tacoma, WA7NTF in Spanaway, WB7OEV in Edmonds, and WA7EAQ-1 in Kennewick. The 5.03 group is working on a hill top digi in western Washington and on forwarding between all the mailboxes. de KA7VKB

EDITORIAL An interesting idea which was discussed at the NAPRA Board meeting on December 18 is the establishment of a satellite gateway. Larry Babcock, WB7USL, is interested in starting to assemble equipment for a satellite gateway. Larry thinks he may have some of the electromechanical gear needed for the rotor system. But he needs help with computers, software, interfacing, site location, and much more. Someone or some organization is needed to coordinate the satellite gateway. Any comments or suggestions? de W7AZU
